Website concept: Noah Kahan

- Website will have a main/home page, one page for each album, and a final page for the Busyhead Project.
- Each album page will explore the album, its songs, and how Noah Kahan's mental health influenced the music.
- Use each album's existing artwork and color scheme as inspiration for its page.
- Include album pictures, concert/tour photos, song lists, and information about the albums.
- Wikipedia has information already organized by album that could be useful as a starting point.
- The overall vibe should feel outdoorsy/wilderness-inspired.
- Potentially add trees along the sides of the pages using PNG images.
- Include Noah Kahan's dogs somewhere on the website, possibly in a corner.

Design direction:

- The topic of mental health is serious, but Noah Kahan also has a silly, humorous personality.
- Typography should balance those two sides. Potentially use a font that is fairly straightforward but has rounded edges.
- Create two different prototype directions:
    1. More serious/elegant aesthetic.
    2. More fun, relaxed, and playful aesthetic.
- Avoid making the entire website feel overly serious. The more playful direction could help make the mental health topic feel approachable.
- The two prototypes will help determine which direction works best.

Other Info:

- Font example: Asap Condenses (feel free to change)
- We will meet after prototypes to see what feels best from each
